Patient Summary

Michael Curtis, born on 12/06/1951, is a 73-year-old male diagnosed with Type 2 Diabetes Mellitus and Peripheral Neuropathy. He has a history of regular hospital visits for managing his diabetes and associated complications. Current treatment focuses on blood sugar control, pain management for neuropathy, and preventative care to avoid further complications. His overall health status requires ongoing monitoring and lifestyle adjustments.

Name: Michael
Curtis

DOB:
12/06/1951

Age: 73

Sex: Male

SSN: 834-06-0500

Hospital ID: HOSP28765470

Patient Lifestyle

Smoking Status: Former

Alcohol Consumption: Rarely

Diet Preference: Diabetic-friendly

Exercise Habits: Mild

Patient Vitals

Heart Rate: 78

Respiratory Rate: 16

Temperature Celsius: 36.7

Oxygen Saturation Percent: 96

Blood Pressure: 130/85 mmHg

Recorded Date: 26/10/2023

Doctor Information

Doctor Name: Alexander Andrews

Doctor Unique ID:
DR47412B

Doctor Notes

Subjective Observations: Patient reports persistent numbness and tingling in feet. Reports difficulty sleeping due to neuropathy pain. Blood sugar levels have been slightly elevated recently.

Assesment: Patient with Type 2 Diabetes Mellitus and Peripheral Neuropathy. Suboptimal glycemic control. Neuropathic pain requiring ongoing management. Stable cardiovascular status.

Recommendations: Adjust Metformin dosage to 750mg twice daily. Continue Gabapentin for pain management. Encourage regular exercise and dietary modifications for better blood sugar control. Consider physical therapy for neuropathic pain.

Follow Up Instruction: Follow-up appointment scheduled in 3 months. Repeat HbA1c and Lipid Panel at next visit. Contact office sooner if experiencing severe pain or signs of infection.
