Doctor Notes

Subjective Observations: Patient reports persistent numbness and tingling in feet, especially at night. Complains of fatigue and occasional blurred vision. Adherence to medication regimen is good. Follows diabetic diet loosely.

Assesment: Patient presents with Type 2 Diabetes Mellitus and Peripheral Neuropathy. HbA1c indicates suboptimal glycemic control. Lipid panel shows elevated LDL cholesterol. Symptoms of neuropathy remain a concern.

Recommendations: Continue current medication regimen. Strict adherence to diabetic diet recommended. Increase physical activity to at least 30 minutes of moderate exercise daily. Consider consulting a [Redacted] or foot care.

Follow Up Instruction: Follow-up appointment scheduled in 3 months. Repeat HbA1c and Lipid Panel at next visit. Report any worsening of neuropathic symptoms or other concerning symptoms immediately.

Past Hospital Visits

Date	Reason
[Redacted]	Routine Diabetes Check-up
[Redacted]	Peripheral Neuropathy Evaluation
[Redacted]	Follow-up for Blood Sugar Control
[Redacted]	Influenza Vaccine
[Redacted]	Foot Examination for Neuropathy
[Redacted]	Annual Physical Examination

Current Medications

Medication Summary	Dosage	Frequency
