Treatment has focused on managing blood sugar levels through medication and lifestyle modifications. Current health status requires continued monitoring and adherence to prescribed treatment plans.

## Patient Demographics

Name: [REDACTED]

DOB: [REDACTED]

Age: [REDACTED]

Sex: Female

SSN: 190-52-9537

Hospital ID:  
[REDACTED]

## Patient Lifestyle

Smoking Status: Never

Alcohol Consumption: Rarely

Diet Preference: Diabetic-friendly

Exercise Habits: Mild

## Patient Vitals

Heart Rate: 72

Respiratory Rate: 16

Temperature Celsius: 36.7

Oxygen Saturation Percent: 98

Blood Pressure: 130/85 mmHg

Recorded Date: [REDACTED]

## Doctor Information

Doctor Name: [REDACTED]

Doctor Unique ID:  
[REDACTED]

## Doctor Notes

Subjective Observations: Patient reports stable blood sugar levels with current medication regimen. Reports occasional numbness

and tingling in feet. Denies chest pain or shortness of breath. Reports adherence to Diabetic-friendly diet.

Assesment: Patient's Type 2 Diabetes Mellitus is currently well-controlled. Peripheral neuropathy symptoms are present but stable. Cardiovascular risk factors are being addressed with medication.

Recommendations: Continue current medication regimen. Reinforce importance of diet and exercise for diabetes management. Encourage daily foot checks and proper footwear.

Follow Up Instruction: Follow-up appointment scheduled in 3 months for HbA1c and lipid panel review. Contact office sooner for any significant changes in symptoms.
