

Patient Summary

John Coleman, born on 06/12/1946, is a 63-year-old male. He has a history of Type 2 Diabetes Mellitus. His current treatment plan focuses on managing blood sugar levels through diet and medication. Regular monitoring of vital signs and blood glucose is ongoing to maintain his health and prevent complications.

Patient Demographics

Name: John Coleman

DOB: 06/12/1946

Age: 63

Sex: Male

SSN: 308-04-4435

Hospital ID:
HOSP41120448

Patient Lifestyle

Smoking Status: Former

Alcohol Consumption: Rarely

Diet Preference: Diabetic-friendly

Exercise Habits: Mild

Patient Vitals

Heart Rate: 78

Respiratory Rate: 16

Temperature Celsius: 36.7

Oxygen Saturation Percent: 97

Blood Pressure: 130/85 mmHg

Recorded Date: 15/11/2024

Doctor Information

Doctor Name:

Ryan
Flores

Doctor Unique ID:
DR49671A

Doctor Notes

Subjective Observations: Patient reports feeling well-controlled on current medication regimen. No complaints of chest pain, shortness of breath, or peripheral edema. Reports occasional fatigue.

Assesment: Patient with Type 2 Diabetes Mellitus and hypertension. HbA1c within target range. Lipid panel shows elevated LDL cholesterol. ECG shows normal sinus rhythm.

Recommendations: Continue current medication regimen for diabetes and hypertension. Increase exercise to 30 minutes of moderate activity most days of the week. Dietary modifications to reduce saturated fat intake. Consider adding Omega 3 supplements for lowering cholesterol.

Follow Up Instruction: Follow-up appointment in 3 months for repeat HbA1c and lipid panel. Schedule microalbumin test to assess kidney function.
